

Linea Kit distribuzione a catena

I Kit Distribuzione TreVi Automotive si distinguono per l'utilizzo di catene potenziate da specifici trattamenti termici anti-usura. Questa tecnologia garantisce un'eccezionale resistenza all'allungamento e una silenziosità di marcia superiore, mantenendo una sincronizzazione perfetta nel tempo.

La precisione della distribuzione è vitale: una manutenzione accurata con componenti di alta qualità evita guasti gravi e assicura al motore una longevità paragonabile al primo equipaggiamento.
